## **Educational-methodical map of the academic discipline**

Methodical recommendations on the organization of independent work of master students in the academic discipline *"Legal support of food security "*

In mastering the knowledge of the academic discipline, an important stage is the independent work of the master student. It is recommended that a time budget for independent work is on average 2-2.5 hours for a 2-hour classroom lesson.

The main areas of independent work are:

- initially detailed acquaintance with the curriculum of the academic discipline;
- familiarization with the list of recommended literature on the discipline as a whole and its sections, its presence in the library and other available sources, study of the necessary literature on the topic, selection of additional literature;
- studying and expanding the lecture material of the teacher through special literature, consultations;
- preparation for practical exercises according to specially developed plans with the study of basic and additional literature;
- preparation for the implementation of diagnostic forms of control (tests, cases, control works, etc.);
- preparation for the academic credit.
